FDC, with facilities in Paris and in Brussels, is an independent engineering and consultancy company which offers study, expert appraisal, technical assistance and programme management services in the field of complex electronic systems such as :

- Navigation and Positioning
- Landing Aids
- Electronic Data Interchange
- Documentary Engineering

Since 1990, FDC has carried out numerous studies in the field of satellite based navigation and positioning systems (GPS, GLONASS, EGNOS, GALILEO,...) for the following customers : European Commission, European Space Agency, EUROCONTROL, Ministry of Defence, Ministry of Transport, Ministry of Research and Civil Aviation Authorities.

Its main competencies are among others :

- technical studies (integrity, interference, ...),
- market surveys,
- user needs definition,
- applications and services,
- institutional issues (PPP, Security, organisational aspects, ...).

In particular, FDC leads the GENESIS Project (www.genesis-office.org) and initiated and co-ordinates the OREGIN initiative.

Leading the way toward satellite navigation
