## Excellence in Satellite Navigation

IFEN GmbH is a privately owned company working in the wide field of satellite navigation with 45 employees, currently. The organization of IFEN GmbH reflects the structural relationship between the two basic activities 'Research & Development' and 'Applications & Services'. Beside administration and quality assurance, the five departments "Customer Applications & Support", "Navigation Projects", "Navigation Products", "Receiver Technology", and "Mobile Solutions" represent the strategic business directions of IFEN GmbH and compose the heart of its working areas.

The competence of IFEN GmbH is based on its in-depth know-how in algorithms and software development related to integrity and positioning solutions as well as receiver and signal analysis, definition and assessment. IFEN GmbH has also gathered key experiences in the fields of high-precision satellite navigation and integrity determination based on the involvement of IFEN GmbH in several Galileo and EGNOS related development projects and studies.

The activity portfolio of IFEN GmbH ranges from system studies over the development of navigation simulation tools and navigation algorithms to integrated turnkey navigation and test systems. IFEN GmbH is also developing and marketing commercial products, applications and services related for satellite navigation.

IFEN GmbH – Your Specialists for Applications, Software, Simulation

Tools, Integrated Navigation and Test Systems for Positioning and

Navigation
