INTECS HRT is a Software-House providing leading-edge technological support to the major European organisations in the design and implementation of complex electronic systems. During its 25 years of activities, the Company has achieved extensive experience in the production of software systems as well as software engineering and quality collaborating with the major Italian and European Space Companies (e.g. Alenia Spazio, Astrium, ESA, ASI etc. etc.).

Large emphasis is also placed on the study and experimentation of innovative technologies, aiming at maintaining its expertise updated with the state-of-the-art. To this end INTECS HRT dedicates over 10% of its annual budget to R&D activities.

Intecs HRT identifies and realizes solutions for the different space fields, such as On Board Software Systems, Embedded and Control Systems, Ground Segment, Simulation and Modelling , Man/Machine Interfaces, Software Engineering, positioning technologies and applications.

INTECS HRT operates at the forefront of the software market, where innovation, complexity and quality aspects are essential to determine the company success.
