

Web site : <http://www.navocap.com>

Founded in 1989, NAVOCAP offers various components to be involved in Intelligent Traffic System (ITS) and Automatic Vehicle Localization Systems (AVLS). The company's systems allow the transmission of voice, alarm, short and long data messages by UHF & VHF CDMA and TDMA PMR radio networks, TETRA, Trunked (MPT 1327) or GSM & GPRS, DARC, RDS protocols.

NAVOCAP is involved in the markets of :

- Bus, Taxis, Forestry Trucks ;
- Wireless communications and tracking technologies (trunked, cellular and private networks) ;
- Specific designs.

Our market segments :

Fleet management systems :

- City buses (Urban transport)
- Coaches (airport shuttles, major lines...)
- Specific vehicle fleets (airport, highways, big firms...)

Embedded localization computers :

- Taxis, trucks...
- Interface for embedded calculators in buses

Military systems :

- Navigation systems for paratroopers
- Airborne guidance systems

Electronic engineering :

- Customized electronics boards and systems
- Test benches : EGNOS, GALILEO.

NAVOCAP has confirmed the benefits brought by the ESA SISNET service (Signal In Space thru internet) for applications of accurate locations in urban sites.

NAVOCAP, Integrator of location and radiocommunication solutions.
