PIAP belongs to the group strong polish research institutions, specialized in the field of unique technical solutions for security, border control and satellite applications. Moreover we have wide network of established contacts with police forces, border control forces, fire fighters, and civil protection in Poland, Czech Republic, Slovakia, Hungary, Latvia, Estonia and Ukraine. In PIAP work over one hundred specialists in the field of information technology, electronics, robotics, mechnronics, metrology and also quality management. Our main areas of expertise are connected with:

- Telemetry, satellite navigation, data transmission and data processing
- Robotics for security
- Dissemination, exploitation and marketing activities connected with technical solutions for security

Besides that, PIAP organizes annually the largest Polish fairs in the area of industrial automation (AUTOMATICON) and international conferences. Our Institute is the owner and publisher of the leading Polish journal in the area of industrial technology entitled "Measurements, Automatics and Robotics".

We are the leading Polish enterprise specialized
in satellite navigation
