Roke Manor Research is a contract research and development business which sells its services across a wide customer base. We have over 45 years of experience in a wide range of technologies across the fields of communications and electronic sensors, and pride ourselves on developing some of the world's most innovative technology.

Whether your business is commercial or defence, we can give a competitive edge by applying our world class expertise in:

- Navigation satellite systems: Galileo and GPS solutions, system definition, simulation and modelling, receiver design and development;
- Communications Technologies in fixed and mobile systems, satellite systems, network management, and internet applications;
- Electronics and Sensing Technologies in optics, radar and acoustics to image processing and positioning technologies;
- Design Services: our expert in-house design services are now available to you.

Roke Manor Research – innovative technology solutions you need!
