TEKELEC SYSTEMES designs, manufactures and sells telecommunication testers, network access devices and synchronization equipment. These products are used by telecommunication service providers to offer new services and ensure the best transmission quality for voice, data and video.

TEKELEC SYSTEMES is a leading European manufacturer with a considerable know-how in Time & Frequency, synchronization domain and achieves exceptional technological integration proposing quartz oscillators, atomic frequency standards, GPS clocks and complete synchronization systems for all types of applications. Main markets are the following : GSM, SDH, CDMA, Wireless 3G, navigation, digital radio and television broadcast, metrology, computer LAN/WAN synchronization, time-stamping for data exchange security (financial transactions...) and ultra-sophisticated systems for military applications. TEKELEC SYSTEMES manufactures a complete range of clocks and synchronization equipment based on the GPS signal, providing cost effective solutions for synchronization requirements.

TEKELEC SYSTEMES is a leading manufacturer of GPS clocks and Time & Frequency/Synchronization Systems.
