Since its formation in 1983, Terrafix has been at the forefront of Mobile Data, Automatic Vehicle Location, Real-time Information and GIS Mapping Systems. These comprise a unique integration of navigation, communications and display technology providing benefits and improvements in operational efficiency across a broad spectrum of mobile environments worldwide.

Security services worldwide, UK ambulance trusts, other emergency services, Ministry of Defence, and commercial transport fleets, to name a few, operate Terrafix systems. These comprise a combination of robust computer platforms, communications interfacing and PC mapping terminals supporting advanced software features in the Terrafix AVL application.

In addition Terrafix offer various maintenance packages, 24 hour technical support and a consultancy service. Terrafix are also holders of the BS EN ISO 9001- 2000 and TickIT certificate.

Terrafix are meeting the ever more demanding requirements of fleet management and mobile data by constantly improving the design and manufacture of its systems and their components.

**Terrafix Limited design, develop and manufacture
Mobile Data, Automatic Vehicle Location, Real-time
Information and GIS Mapping Systems.**
